Fee (fī), *sb.*[1] Forms 4 5 fe, feo, fey, 6 fie, 3– fee *Pl.* 3 fees, 3–4 feez, 5 fese, 5–6 feeze, 6 feas, feis 4 fees See also Feu-Fuid *sb.*[2], Fief *sb.* [a Al *fee fee* = OF *fé, fié, fief* (app implied in *fiez pl.*, *fiefz, fient, fit, Pr feo feu, feu*, It *feo* (prob. from Fr or Pr), the Langobardic Lat. *fadi-feum* is a compound of Teut *fihu* Fee *sb.*[1], med.L *feodum, feudum* (first cited by Du Cange from a charter of Charles the Bat., A.D. 884, also *feum feum, fiduum*, in Sicily *feagum*

The mutual relation of the various Romance and med. forms is somewhat obscure. According to some scholars, *feif* is a vbl. sb. f. *feiver* to grant in fee, f. *feu*, which, is well as the other forms of the sb., descends from *feodum* or its Teut. source. Another etymology is more probable. A prevalent view is that the word was f. OHG *fehu* cattle, property, money (= Fel. *sb.*[1], + *ôd* wealth, property. This must be rejected, because such an etymology could directly yield no other sense than that of 'movable property', which is very remote from the sense of *feodum*, known in early records, viz. usufruct granted in requital of service (often opposed to *alodis*, originally meaning 'inheritance'), cf. the synonyms, Ger. *lehen*, OI. *len* (the same word as Eng. *loan*), and L. *beneficium*, i.e. something granted to a subject by the landlord. Equally untenable is the theory that the OF *fief* is an adoption of the Teut. *fehu* in the contextual sense of 'wages, payment for service', the Rom. word certainly had this meaning (see branch II below), and it is conceivable that the feudal sense is a specific application of it. The of that the L. *feodum, feudum*, however, is left unexplained by this hypothesis, some regard it as a euphonic insertion (comparing It. *chiodo* nail from vulgar L. *clo.um* from *clavum*), others think that it is due to the analogy of *allodium*, and others suppose *feudum* to be a vbl. sb. f. *feudare* = *fendare*, but each of these views involves serious difficulties. It is not impossible that two originally distinct words may have been confused. A conjecture proposed by Prof. Kern, and approved by some German jurists, is that *feodum* represents an OHG *fehôd*, related to the vb. *fehôn*, which is recorded only in the sense 'to eat, feed upon', but is supposed to have had other senses, to have had the wider meaning 'to take for one's enjoyment'. This would account fairly well for the sense, but involves too much hypothesis to be accepted with confidence. It is curious, if the word be of Teut. formation that there is no direct proof of its having existed in any Teut. language, nor is it found even in the Textof the Frankish laws.]

Possibly cognate with OTeut. **felþan-* (see FELE *v.*), in the sense 'to fit together' (recorded for the OHG. *felahan*).

The diversity of forms is due to the varying pronunciation of the OE. *g*, depending, on the nature of the sound which followed it in the inflected cases. In the plural *felge* it was the voiced guttural spirant, which in late ME. developed into *w*, producing the *β* forms. In the dative *felʒe* it was the voiced palatal spirant, and this very early became *y*, voiced *z*, whence the *γ* forms. The *δ* forms are due to the normal unvoicing of the *z* where it was final, viz. in the nom. and accus. sing.; the resulting sound (*s*) eventually developed into *f*. Cf. *laugh*, *enough*, etc., in which dialects, however, it became (k), and in others was dropped (With the forms *felf*, *felk*, cf. the Derbyshire place-name now variously spelt *Belph*, *Belk*, but in 13th c. *Belgh*.) In England the forms *felloe*, *felly* seem to be equally in good use, in the sense in which it is here restricted.)

7 In college and university use

a *orig* The name (corresponding to the Latin *socius*) given to the incorporated members of a college or collegiate foundation (whether in a University or otherwise see COLLEGE 4), one of the company or corporation who, with their head, constitute a 'college', e g 'the Provost and Fellows of Chelsea College, of Eton College, or King's College, Cambridge', 'the Warden and Fellows of All Souls, Oxford'

In colleges chiefly devoted to the purposes of study and education, the Fellowships were, in early usage, often included under the name of *Scholars*, but in later use, mostly restricted to junior members of the foundation, who are still under tuition, the term *fellow* being applied to the Senior Scholars, who have graduated, or otherwise passed out of the stage of tutelage In those colleges that have become exclusively educational institutions, undertaking the school or university teaching of youths not on the foundation the Fellows consist of those graduate members who have been so opted upon the foundation with emoluments from its corporate revenue, and who constitute with their Head (usually elected by the Fellows from their own number) the governing body of the institution Most colleges of this class have now also *Honorary Fellows*, who receive no emoluments, and have no share in the government When a distinguished man vacates his fellowship, he is often elected an honorary fellow

b On the analogy of the preceding use, the designation 'Fellows' is now applied, in some universities, to the holders of certain stipendiary positions (called 'Fellowships') tenable by elected graduates for a limited number of years, on condition of pursuing some specified branch of study

The Radcliffe and the Craven Travelling Fellowships are the only examples in the ancient English Universities. Fellowships in this sense have been founded in the Scottish Universities, in the University of Durham and the Victoria University, and in some universities and colleges in the U S

1888 *Histor Reg Univ Oxf* 110 Every Fellow is required to spend at least eight months of each year of his tenure of the [Craven] Fellowship abroad *Ibid* 122 The first two Fellows were elected [to Radcliffe's Travelling Fellowships] in July 1715 1892–3 *Edin. Univ Cal* 537 Scholars, Bursars, or Fellows must apply to the Convener of the Science Degrees Committee.

c In some of the younger British universities and colleges, and in some of those in the U S, the 'Fellows' are the members of the governing or administrative body, in others the title is merely honorary, conferred as a special distinction on a limited number of graduates Cf sense 8

1837 *Charter Univ Lond*, The Chancellor, Vice Chancellor, and Fellows shall constitute the Senate of the said University

In 14th c it implied polite condescension, = 'comrade', 'my friend' (cf mod I *mon ami* similarly used) In Shakspere's time this notion had disappeared, but the word when addressed to a servant does not seem to have necessarily implied haughtiness or contempt, though its application to one not greatly inferior was a gross insult (cf 6)

The ultimate etymology is uncertain Of the many conjectures proposed the most probable is that *fellone m* is a derivative of L *fell*, *fel* gall, the original sense being 'one who, or something which, is full of bitterness' (not 'venom', the two notions, as many linguistic facts show, being closely associated in the popular mind) In support of this view it may be pointed out that the sb has had the senses of 'an envenomed sore' and 'cholera' (see Felon *sb*[2]), moreover, this etymology accounts perfectly for the strangely divergent senses which the adj has in the Rom langs, 'wicked', angry', 'brave', 'melancholy, sad' (It *fellone*), 'intensely painful' Of the other suggestions that have been made the most plausible is perhaps that of Prof R Atkinson of Dublin, that *felon* was originally a term of abuse = Ir. *feallóra* as used in a peculiar sense by Martial and Catullus Some scholars think that *fillo* is from OHG **fillo*, an unrecorded derivative of *fillen* to scourge (cf Ger *fillen* rascal), others have sought to connect it with the obscure second element in the OE words *wælfyll* (from *wæl* carnage, *ācumming* only once, as an epithet of the raven) and *wilfele*, *ealfele* (usually supposed to be from *eal* all, only twice, as an epithet of *attor* poison) The mod Da *fel* horrible, disgusting, has also been compared, the MDu *fel* is adopted from Fr The Celtic words often cited are out of the question, the OIr word cannot have come from Wales or Ireland, and Gaulish appears not to have possessed the sound *f* the Welsh *ff* and the Irish *f* do not correspond etymologically]

Fermentation (fɜmĕntē·ʃən) [ad. L. *fermentātiōn-em*, n. of action f. *ferment-āre* to FERMENT.] The action or process of fermenting.

1 A process of the nature of that resulting from the operation of leaven on dough or on saccharine liquids.

The features superficially recognizable in the process in these instances are an effervescence or internal commotion, with evolution of heat, in the substance operated on, and a resulting alteration of its properties. Before the rise of modern chemistry, the term was applied to all chemical changes exhibiting these characters, in Alchemy, it was the name of an internal change supposed to be produced in metals by a 'ferment', operating after the manner of leaven. In modern science the name is restricted to a definite class of chemical changes peculiar to organic compounds, and produced in them by the stimulus of a 'ferment' (see FERMENT *sb.* 1), the various kinds of fermentation are distinguished by qualifying adjs., as *acetous*, *alcoholic*, *butyric*, *lactic*, *putrefactive*, etc. (see those words). In popular language the term is no longer applied to other kinds of change than those which it denotes in scientific use, but it usually conveys the notion of a sensible effervescence or 'working', which is not involved in the chemical sense.

Fetch (fɛtʃ), *sb* 2 [Of obscure origin

Although Grose in our first quot suggests the word to the north of England, there seems to be no other evidence that the simple *sb.* was ever in popular use elsewhere than in Ireland. The supposition that it is shortened from Fetch-light, or some equivalent compound of the *vb* stem, would plausibly account for the sense. On the other hand, it may be noted that the Corpus Glossary *a* 800 has '*Fracce* maere' As *fracce* seems to admit of no explanation as a Lat. word, it may be conjectured to be OE., and the source of the present *sb.*, in the archetype followed *fracc* and *maere* (nightmare) may have been given as alternative English glosses on some Lat. word, and the compiler may have mistaken the former for a Lat lemma.]

Cf OE. *orcæard* orchard from *ort geard*

Although no other instance is known in which the change of *ti* into *cc* (=tʃ) has occurred, the correctness of the explanation is strongly supported by the fact that in OE. the forms with *cc* are confined to those parts of the *vb* in which the regular conjugation of *fetian* has an *i*. Thus *fetian, fette, fetiað* gave place to *feccan, fecce, feccð*, but *feta, fetast, fetaþ* remained unchanged.]

Several L adjs in *-ficus* form their comparatives and superlatives, and their nouns of quality, from a stem in *-ficent* In Eng (but not in Romance) the adopted forms of these words end in *-ficent*, as *beneficent*, *magnificent*, *maleficent*, *munificent*

F vbs in *-fier*

with their corresponding agent nouns in *fication* have been freely introduced into Eng, as *purify, purification, sanctify, sanctification*, and hence the suffix *-fication* has become the recognized means of forming nouns of action corresponding to vbs in *-fy*, except such as represent L vbs in *-ficere* (see -FACIENT). In general, however, such nouns of action are (unless as mere nonce-wds) formed only on assumable mod L types, but *beautification* has been in use since 17th c, and words like *Frenchification, transmogrification, mollification* may occasionally be met with. In scientific language the suffix forms many sbs (some of which have no corresponding vb), examples are *acidification, acidification, chylification, dentification, ossification* etc.

Filibuster (fi·libəstə), *sb* Forms **6 flibutor**, 8–9 **flibustier**, **9 fillibustier**, **fillibuster**, **flibuster** [The ultimate source is certainly the Du *vrybuiter*, in Kilian *vrij-buiter* (see FREEBOOTER) It is not clear whether the 16th c Eng form *flibutor*, of which we have only one example, was taken from Du directly or through some foreign lang Late in the 18th c the F form *flibustier* was adopted into Eng, and continued to be used, with occasional variations of spelling, until after the middle of the present century About 1850–54, the form *filibuster*, ad Sp *filibustero*, began to be employed as the designation of certain adventurers who at that time were active in the W Indies and Central America, and this has now superseded the earlier *flibustier* even with reference to the history of the 17th c

The mutual relation of the forms is involved in obscurity It is possible that the corruption of *fri-* into *fl-* may be due to the influence of the word FLYBOAT (Du *vlieboot*, whence F *flibot*, Sp *flibote*), but against this it may be urged that in our first quot the word seems to be applied to marauders on land In Fr the form *fribustier* (which may be a corruption of Eng *freebooter*) occurs in Du Tertre *Hist. des Ant-Isles* (1667) III. 151, but *flibustier* is app first recorded in A O Oexmelin (Esquemeling) *Hist des Avanturiers* (1686); this writer says that it comes from the Eng. *flibuster* 'corsair'; in the earlier ed of the work in Dutch (1678) the word does not occur. It is possible on the one hand that the corrupt form of the Du word may be of Eng origin, and may have been taken into F from its use in the Eng colonies in the W Indies, or, on the other hand, that the F. form arose in the European wars of the 16th c., and is the immediate source of Garrard's *flibutor* In any case the insertion of

the *s* probably originated in Fr. as a mere sign of vowel length, though from the *Dictionnaire de Trévoux* we learn that the *s* was already pronounced in 1704. In the *Dict. etymologique* of Ménage (who died in 1692), s.v. *flibot*, the form *flibustier* occurs, with the explanation (doubtless erroneous) 'celui qui gouverne un *flibot*.' The Sp. *filibustero* is presumably ad. F. *flibustier*.]

L. *finus*), prob. a back-formation from *finire* (pa. pple. *finito*) to FINISH. On the analogy of the many Rom. vbs. in *-ire* derived from adjs. (e.g. *grossire* to make thick, f. *grosso* thick) the vb. *finire* seems to have been felt to presuppose an adj. *fino*. Similar back-formations (from adjs. of ppl. form) are Sp. *cuerdo* intelligent from L. *cordātus*, It. *manso* gentle from L. *mansuētus*. The Rom. word has passed into all the Teut. langs., cf. In Fr. the word now chiefly expresses delicate and subtle perfection, as opposed to all that is gross or clumsy. In Eng. the senses derived from this notion are still current, but the word came to be used as a general expression of admiring approbation, equivalent to the Fr. *beau*, which it renders in many adopted locutions.]
